OF THE GOVERNOR’S BLUE RIBBON COMMISSION**

NOVEMBER 27, 2018

**MICHAEL J. FARRELL, CHAIR
PRESIDENT KENDRA BOGGESS
DR. AMELIA COURTS
PRESIDENT ANTHONY JENKINS
DALE LEE**

Collaboration in higher education is and has simultaneously been a mandate for some and an aspirational concept to others. A few institutions have robust collaboration partnerships and initiatives. Seemingly, the remaining institutions have had their collaborative ambitions restrained by lack of opportunity, finances, creativity and manpower.

Every West Virginia institution of higher education aspires to collaborate with as many entities as financially, beneficially and geographically possible. There is no guarantee that every collaboration will be successful. Success or even existence of collaborations has not been the yardstick by which this Subcommittee evaluated our campuses during its Blue Ribbon Commission inquiry. Rather, the Subcommittee sought to be inclusive and instructive by inviting all four-year institutions to disclose their successful and failed collaborative efforts. Even though the study time for this Subcommittee’s endeavor was brief, we assembled an inventory of the active collaborative projects that are attached in the Appendix to these Findings and Recommendations. Review of the Appendix is strongly recommended by each member of the Blue Ribbon Commission because it includes a listing of every disclosed collaboration and strategic initiative that is active on West Virginia four-year institution campus. These accomplishments have never been published in a single document before and, therefore, review of the Appendix should materially benefit the President of each institution because it provides confirmation that collaboration can be both prestigious and profitable.

What is a Collaboration in the Context of Higher Education?ⁱ

In its simplest distillation, it is a mutually beneficial relationship. The dictionary definition of a collaboration is that it is the action of working with someone to jointly produce or create something. The word itself can have both positive and negative connotations.ⁱⁱ In the context of the task identified by the Governor in his Executive Order, the benign characteristics of a voluntary collaboration comprise effort by one or more organizations (colleges, universities, associations, governmental entities, hospitals, schools, and/or individuals) working with one another through which human and financial resources are pooled to accomplish a favorable outcome for all participants and intended beneficiaries. The collaborators, educational institutions and their partners, are the obvious beneficiaries in accomplishing the goals of the relationship. The Subcommittee believes that there are many indirect beneficiaries that emerge from higher education collaborations with outside entities including other domestic and outside the United States educational institutions.

West Virginia strives to increase its college educated population. West Virginia also strives to attract new business and industry. It is axiomatic that business and industry are gravitate to locations where the town and gown are intertwined and mutually supported. The Subcommittee acknowledges that our colleges and universities actively seek students from other states and from across the globe. The multistate and global collaborative relationships described in the Appendix confirm that our educational leaders recognize that the competition for the decreasing supply of West Virginia high school graduates demands that recruiting efforts extend beyond our state borders and the borders of the United States.

Collaborations produce a talent pool who become vested in the success of the institutions. Many are unpaid but very active participants who become knowledgeable about and involved in

promoting the success of the academic mission of the campus and serve as ambassadors for the collaborating higher education institution. The potential return on investment to each four-year college and university from each collaboration seems high and promising. At a minimum, the exchange of ideas and investment of human capital promote a more cohesive market for increasing enrollment and advancing the institutional missions.

If the Subcommittee were to construct a hypothetical collaboration toolbox, it should begin with an inventory form to be completed by each President. He or she should review the Appendix to compare and contrast what collaborations exist within the State, identify which ones are feasible for their campus and take action to timely implement as many as possible. The toolbox should also include a calendar through which all of the four-year West Virginia Presidents agree to select a date and meet, at least semiannually, for a Statewide Collaboration Conference. The agenda for such a conference is simple—every West Virginia institution should voluntarily and proactively evaluate what collaborations can be implemented statewide or with each of the individual campuses. Ideally, each campus will accept the moral obligation to develop programs that reduce expense for students or otherwise promote the improvement of every other campus.

DISSECTING THE ABSENCE OF STATEWIDE COLLABORATIVE PARTNERSHIPS

A disturbing revelation to the Subcommittee was the disparity in number and breadth of collaborative partnerships by and between West Virginia's four-year colleges and universities. Comparatively, while the smallness of our state should produce inclusiveness, it does not. Rather, collaborations among four-year West Virginia colleges and universities are relatively infrequent when measured by the diversity of the external collaborations formed by West Virginia University and Shepherd University.

There was general agreement that the communications among our campus Presidents are impaired and sometimes dysfunctional, despite significant size and mission variances, because

trust is lacking in a system that is fiscally challenged following years of budget cuts. Metaphors abound to describe the financial burden on students, faculty, administration and infrastructure of almost all of the institutions. The competitive and psychological strain that accompanies any change, particularly the possibility of adoption of a funding formula, has caused the campuses to get prepared for uncertain times. Uncertainty breeds distrust and competition. Consequently, the campuses identify themselves first as competitors and infrequently as collaborators. Looking at the obvious metric, the Subcommittee acknowledges that all of the campuses compete for Promise Scholars. WVU recruits a disproportionate share of these state-funded scholars. WVU and Marshall share other competitive advantages over the regional schools because of the program approval control granted in 2005 by W. Va. Code §18B-1B-4(37)(b)(4) that divested HEPC of program approval except when a program is proposed at a new location (*e.g.* the move of WVU Tech from Montgomery to Beckley). More recently, WVU, Marshall and the West Virginia School of Osteopathic Medicine successfully persuaded the Legislature to reduce coordinating oversight by HEPC in many significant ways. *See*, W. Va. Code §18B-1-2.ⁱⁱⁱ When the Executive Order referred to “patchwork” policies within higher education, the Subcommittee finds that the disparity exists between the exempt schools (WVU and MU) and the regional colleges and universities. In light of the gross disparity in the number and scope of the collaborations between WVU and all other institutions, the Subcommittee endorses not only a recalibration of funding for the regional schools as recommended by the Finance Subcommittee of the Blue Ribbon Commission but also a modification of Chapter 18B of the West Virginia Code to impose a statutory obligation on both WVU and MU to develop and implement collaboration partnerships with each regional college and university..

The Subcommittee concludes that West Virginians need to be more focused on helping each other rather than competing with each other. The shift from exclusivity to inclusiveness

might be the catalyst that enables more higher education institutions to secure outside funding and lower the cost of obtaining a degree for each student.

Visualizing the mirror image of collaboration is instructive particularly when giving West Virginia higher education a report card on its collaboration initiatives. Imagine individual silos for each West Virginia college and university, constructed across the state terrain, at their present locations. Apply the correct name to each silo—college, university or school of medicine. Within each silo, teachers teach, students learn and administrators manage. Within the silo, appreciate the barriers to learning, growth and development of communities proximate to each silo because the learning and intellectual discourse is confined to the interior of the silo.^{iv} A function of this Subcommittee was to illuminate collaboration opportunities that will improve the State.

Imagine, for example, how many graduates of the Osteopathic School of Medicine might stay in West Virginia and serve a rural population if they could do their residencies in West Virginia Hospitals owned and operated by WVU. Imagine how many students would complete their higher education in West Virginia if our course numbering system across all institutions within the State facilitated transfers rather than penalized them. Imagine if our West Virginia four-year colleges and universities had revenue sharing agreements that would facilitate expansion of WV Rocks and provide open access for all campuses to many classes that can be taught in smart classrooms and broadcast statewide or to discreet locations.

A CHANGE IN EDUCATIONAL PERFORMANCE METRICS IS NEEDED TO INCENTIVIZE COLLABORATION

The Higher Education Policy Commission (“HEPC”) annually publishes a Report Card for the benefit of the higher education institutions, the public, as well as our Legislature and Executive branch. None of the metrics published in that text identify or evaluate the

participation, successes or failures of an institution that invests its time, resources and reputation in participating in collaborative endeavors with other state institutions of higher learning or externally. The Subcommittee recommends that this omission will be corrected in 2019.

Both the Executive and Legislative branches of State government need to prioritize the provision of funding that will enable all of our colleges and universities to form, develop and benefit from collaborative ventures. Performance standards exist. Among our institutions, respect and appreciation must be extended to both West Virginia University and Shepherd University for their respective collaboration efforts that have produced a significant return on investment for each. The Collaboration Subcommittee recommends that President Mary Hendrix chair and these two Universities co-host the first semi-annual Collaboration Summit for the benefit of all West Virginia four-year colleges and universities with the Agenda being the “Fundamentals of Developing and Benefitting from Statewide and External Collaborative and Strategic Relationships.” The Subcommittee recognizes that there is a significant difference in resources available to West Virginia University and, for example, Bluefield State College. However, the Subcommittee finds that there is insufficient knowledge sharing and communication between and among the four-year institutions about the formation and operation of collaborations. Unless knowledge sharing increases, including the formation of more collaborative endeavors between the two major universities and the regional colleges and universities, West Virginia higher education institutions will continue to suffer from a lack of mutual trust and remain locked in their respective silos.

The Subcommittee recommends that the HEPC or its successor should serve as a clearing house where all colleges and universities can identify and access “collaboration mentors” within the West Virginia family of higher education. HEPC can and should be a facilitator that provides models and training regarding the formation and operation of higher education cooperatives.

**West Virginia Colleges and Universities Have the Capacity to Form
And Develop Collaborations, Strategic Partnerships, Outreach Initiatives
And Other Productive External Relationships**

This Subcommittee has identified and explored multiple forms of collaboration that our college and universities have deployed and a few failed collaborative endeavors. Applying the Putnam paradigm discussed above, based on the Collaboration Subcommittee Public Hearings and attached submissions, some, but not all, of West Virginia higher education institutions appear to have been unable to form plentiful external collaborative relationships and consequently have failed to access their “social capital.” This Report is intended to showcase the collaboration successes which shine not only because of their number but also because of their geographic and subject matter diversity, breadth and creativity.

In the attached Appendix, the Collaboration Subcommittee has reproduced the submissions by each of the four-year institutions. This Appendix provides a playbook for all of the institutions to compare, contrast and ask “why not me”? The comparison between like-sized schools commends the efforts by Shepherd University to create a zone of influence in geographic proximity. Their domestic partners include municipal, county and state partners across the states of West Virginia, Virginia and Maryland. Among its more than forty “Strategic Alliance Partnerships,” Shepherd’s relationships also involve Maryland.

**GEOGRAPHIC PROXIMITY MUST BECOME A COLLABORATIVE PATHWAY
AND NOT AN EXCLUSIONARY BARRIER**

For decades, legislators and other interested public officials have asked if Bluefield State College and Concord University could combine services or achieve cost-savings through one form of collaboration or another. The leadership of these two institutions began this process with the assistance of retired Chancellor Paul Hill several years ago. Both institutions recognized the value and necessity of collaboration long before the appointment of the Blue Ribbon

Commission. The Subcommittee observes that the move of WVU Tech from Montgomery to Beckley added a third four-year institution to a relatively small and now oversaturated educational market. The Subcommittee also notes that of the three institutions, only WVU Tech had positive enrollment for the 2018 Fall semester. They have been reluctant to find ways to share their strengths or assist the less endowed in addressing their weaknesses. Rather than being an asset, the proximity of larger and smaller institutions has prompted competition for the many of the same students and attractive new “hot” academic disciplines. West Virginia State University and Marshall University share the same metropolitan footprint with each other and their former attached community and technical colleges (Bridge Valley and MountWest). They have joined the “proximity” dilemma for allocating resources and reducing costs for students when the competition for supremacy is costly and the resources are disproportionate. Significantly, Marshall University and West Virginia State University are presently advancing a joint project with the West Virginia Department of Commerce under the umbrella of the Alliance for the Economic Development of Southern West Virginia.^v Separately, West Virginia University, Marshall University and the Department of Commerce are “chartering a roadmap for economic recovery for the whole state of West Virginia.”^{vi}

While preparing this report, the Subcommittee read the November 16, 2018 edition of The Chronical Review which published an article that identified and provided capsule summaries about the “Most Influential Books of the Past 20 Years.” The selection of ***Bowling Alone: The Collapse and Revival of American Community*** by Robert Putnam^{vii} is relevant to the Findings and Recommendations by the Subcommittee. The reviewer, Eric Klingenberg, wrote:

Putnam’s thesis, so evocatively captured in the title, is that American democracy and society are suffering from a prodigious decline in “social capital,” which (following Pierre Bourdieu and James Coleman) he defines as the connections among individuals as well as the norms of reciprocity and trustworthiness that derive from them. He presents the argument with an impressive array of empirical data, much of it historical. Putnam

charts falling rates of participation in voluntary organizations, voter turnout, church attendance, protest activities, and several other forms of collective life.^{viii}

The Subcommittee recognizes that collaboration is a give and take process. For the non-institutional collaborator, the array of benefits can range from have access to educated human resources who might student teach, intern or volunteer. For the four-year school, it has the opportunity to favorably impact its community and expand its reputation and influence beyond its contiguous city, county and state. Each reader of this report is encouraged to review the entire Appendix. One of our esteemed BRC Co-Chairs wrote the following as this Blue Ribbon Commission process began: “My worry is that people tend to advocate for their position rather than raising the bar to talk about what is best for the state.”^{ix} This Subcommittee has found probative evidence to support this concern and prediction.

The Findings and Recommendations published today, pursuant to the Executive Order issued by Governor Justice, address “collaboration” and the lack of collaboration.

FINDINGS

- 1. External collaborations by and among West Virginia higher education four-year institutions are integral to the success of the higher education mission of providing the best possible education to each student at a reasonable and affordable cost.**
- 2. While it is reasonable that almost all four-year institutions focus on creating external collaborations, the number of collaborations by and among West Virginia higher education four-on year institutions with each other are insufficient to promote the higher education public policy articulated by Governor Justice in the Executive Order.**
- 3. Excessively competitive behavior by and among West Virginia’s four-year institutions creates trust barriers that adversely affect the willingness of many institutions to collaborate one with another for the benefit of the students.**

- 4. Voluntary collaborations between and among West Virginia's four-year institutions have been infrequent and have not produced significant economic benefits to the smaller collaborator.**
- 5. There is a void in State Code regarding the establishment of mandatory collaborations among and between West Virginia's four-year institutions and/or two-year institutions.**
- 6. External collaborations by and among West Virginia higher education four-year institutions produce access to sources of revenue for research and economic development for the engaged four-year institution.**
- 7. External collaborations by and among West Virginia higher education four-year institutions promote beneficial public policy by introducing external individuals, organizations, corporations, municipal, county, state and federal governmental entities to the students, classified staff, faculty and administration of the respective educational institutions.**
- 8. Despite active institutional external collaborations with business and industry, the establishment of more Advisory Committees composed of qualified graduates and qualified individuals would promote better alignment between curriculum and the critical thinking and technical skills sought by business, industry and professional schools as well as post-graduate job placements.**
- 9. External collaborations by and among West Virginia higher education four-year institutions produce goodwill.**
- 10. There are no collaboration agreements between West Virginia University and West Virginia School of Osteopathic Medicine that provide equal access to residency programs at West Virginia University Hospitals across the State for graduates of West Virginia School of Osteopathic Medicine.**
- 11. Glenville State College, a leader among four-year institutions in minimizing the economic burden on its students by electing not to increase tuition, is "looking to develop a cooperative education program to work with local and regional employers to decrease student debt and respond to employment gaps in the West Virginia private sector job market.**
- 12. Bluefield State College and Concord University, years before the formation of the Blue Ribbon Commission with the assistance of retired HEPC Chancellor**

Paul Hill, accomplished an administrative collaboration regarding shared administrative services.

- 13. WVU Tech entered the relatively small educational market already occupied by Bluefield State University and Concord University and should be well-suited to cooperatively work with Bluefield State University and Concord University to achieve a model collaboration program that would allow access to students on all three campuses to disciplines of mutual interest.**
- 14. The leadership of West Liberty University and Fairmont State University with the assistance of HEPC Vice Chancellor Corley Dennison have the interest, capacity and skill set to implement a statewide revenue sharing plan that would provide access to high demand and specialized classes and disciplines through the use of new broad band technology and WV Rocks.**
- 15. Because of the close proximity of their campuses in the Charleston-Huntington Metropolitan Area, the leadership of West Virginia State University and Marshall University and because of the close proximity of their campuses in the Beckley-Bluefield Metropolitan Area WVU Tech, the leadership at these five institutions are well-suited to develop and propose a model for on-campus revenue sharing and degree awarding plans that are beneficial to both the students and institutions.**
- 16. The impressive portfolio of collaborations, partnership and other domestic and global relationships disclosed by West Virginia University and Shepard University endorse them as the co-hosts for the first of the proposed semiannual West Virginia Higher Education Four-Year Institutions Collaboration Conference.**

RECOMMENDATIONS

1. STRENGTHEN COLLABORATION TO ENHANCE STUDENT ACCESS

- a. The State should improve and invest in WV Rocks to the level that students at every institution can access courses at other institutions as determined by the**

institutions through a Statewide Collaboration Conference populated by the Presidents.

- b. The State should create a collaborative revenue distribution plan among institutions for courses attended through technology.**
- c. The State should require statewide articulation agreement by and between all two year and four year institutions.**
- d. The State should mandate that all two-year and four-year institutions collaborate and adopt a common course numbering system so that students can transfer and complete degrees efficiently.**

2. STRENGTHEN COLLABORATION TO INCREASE STUDENT AFFORDABILITY

- a. The State should create a fund that is used to subsidize collaborative internships at each four-year institution with the objective of demonstrating the skills and knowledge of the students to business and industry and incentivizing graduates to remain in West Virginia after graduation.**
- b. The State should study the impact of the financial barriers for West Virginia students and provide tax incentives for West Virginia businesses that provide paid internships to both undergraduate and graduate students enrolled as full time students in a West Virginia four-year institution.**
- c. The four-year institutions should develop more employment opportunities on campus to provide supplemental sources of income for students who cannot afford tuition and fees.**
- d. The four-year institutions should develop tuition waiver programs for those full-time students engaged in on-campus and off-campus collaborative endeavors that provide pro-bono services to the institution or surrounding populations.**

3. STRENGTHEN COLLABORATION TO BUILD INSTITUTIONAL CAPACITY AND SUSTAINABILITY

- a. The Collaboration Subcommittee recommends that President Mary Hendrix chair and these two Universities co-host the first semi-annual Collaboration Summit for the benefit of all West Virginia four-year colleges and universities with the Agenda being the “Fundamentals of Developing and Benefitting from Statewide and External Collaborative and Strategic Relationships.”**

- b. The State should include within its four-year higher education funding model credit for a minimal level of meaningful inter-campus collaborations that share the expertise, experience and potential economic benefits with every campus.**
- c. The State should mandate that the HEPC or successor entity should develop a policy that credits each institution for its proportionate contribution to the retention and graduation metrics.**
- d. The State should affirmatively compel the two major universities to develop meaningful collaboration projects and relationships with each of the four-year colleges and universities.**
- e. The four-year institutions should develop better and stronger collaborative relationships with graduates, local public school systems, as well as local and regional business and industry representatives by including them as members of Advisory Committees to the respective departments, schools and colleges.**
- f. The four-year institutions should develop better and stronger collaborative relationships with graduates, local public school systems, as well as local and regional business and industry representatives by encouraging them to hire undergraduate and graduate students in exchange for discounted or access to cultural events, a library and/or athletic events.**
- g. The Subcommittee recommends that the HEPC or its successor should serve as a clearing house where all colleges and universities can identify and access “collaboration mentors” within the West Virginia family of higher education.**

ⁱ See e.g., Kochan, F. K., Mullen, C.A.,, "An Exploratory Study of Collaboration in Higher Education From Women's Perspectives, 14 *Teaching Education* (August 2003)
<https://www.soe.vt.edu/carolmullen/pdf/KochanMullenTE.pdf>

ⁱⁱ During multiple previous wars, individuals who betrayed their country were labeled “collaborators.”

ⁱⁱⁱ The following summaries of changes to the West Virginia Code, as championed by West Virginia University in House Bill 2815 Bill reinforce the theme set forth in these Findings and Recommendations that the State should expect more from West Virginia University, Marshall University and the West Virginia School of Osteopathic Medicine (“Exempt Institutions”).

Summary of HB 2815

Effective 90 days from Passage (April 8, 2017)

- 18B-1-5a----Repeals pilot distance learning program
- 18B-1-10---Repeals merger statute of Potomac State with WVU
- 18B-1A-3---Repeals selection of peer institutions for institutions
- 18B-1B-10---Repeals goals of efficiency for Bluefield and Concord
- 18B-1B-13---Repeals studies of issues affecting higher ed employees
- 18B-2-5---Repeals statute establishing WVSOM

-
- 18B-2-7---Repeals authority to sell parts of Potomac State College
 - 18B-5-2a---Repeals authorization of institutional transfer of funds between accounts
 - 18B-1-2. Definitions section.
 - “Approve” or “approval” when used by HEPC and CTC means giving “due consideration” to the BOG rationale for the action and whether BOG action is consistent with law and established policy and is an “appropriate advancement of the public interest”. It is not set out whom the “established policy” is set by.
 - “Confirm” or “confirmation” when used by the HEPC (this phrase is not used in conjunction with CTC actions) means when “substantial deference” is allocated to a BOG action and HEPC review is only to determine whether proposed action of the BOD is consistent with law and established policy. (Established policy is not defined as source or subject.)
 - “Exempted schools(“**Exempt Institutions**”) are WVU, MU and WVSOM
 - “Peer institutions”---deleted
 - “Vice Chancellor for Human Resources”---Definition deleted.
 - 18B-1-6. Rule-making.
 - Rule-making authority by the HEPC cannot overrule or limit rule-making authority of **Exempt Institutions**
 - HEPC to promulgate rule to guide development of rules by the non-EEs. EEs promulgate their own rule-making rules.
 - All such rules by HEPC, CTC and **Exempt Institutions** shall provide:
 - Public notice including 30 day notice
 - Designation of location to access rules
 - Maximizing internet access
 - Except for the EEs a procedure for governing boards to submit rules to HEPC for comment and CTC for approval.
 - HEPC has 15 days to submit comments
 - Comments to be made part of BOG minutes
 - BOGs to submit adopted rules within 15 days to HEPC and CTC
 - Rules of HEPC and CTC remain in effect until institutions adopt a rule
 - 18B-1B-6. Establishment of HEPC.
 - HEPC to be made responsible for providing shared services upon request by state college and universities, CTC and CTC schools when requested. **Exempt Institutions** not included in that language.
 - HEPC authority to “oversee” public policy agenda for higher education deleted
 - HEPC to now work collaboratively with the governing boards to gain consensus on public agenda instead of just with CTC
 - 18B-1B-2. Composition of HEPC.
 - Deletes requirement that 4 at-large members be interviewed by Legislative leadership
 - Adds 3 at large members designated as higher education representatives which Governor is to choose from among recommendations of the HEPC institutions.
 - 18B-1B-4. Powers and duties of HEPC
 - HEPC to provide shared services upon request of all bodies but the **Exempt Institutions** and undertake certain statewide and regional initiatives such as financial aid
 - Deletes requirement to “oversee” public policy agenda
 - Deletes requirement for “implementation” of master plan
 - **Exempted Institutions** exempt from financing rule
 - Adds Boards of Governors to CTC as bodies HEPC must collaborate with in public policy agenda
 - Repeals requirement to adopt institutional compacts: must only “confirm” compact of non-**Exempt Institutions**.
 - Changes HEPC from accountability point to state policy makers to “a” point of contact
 - Removes duty to promulgate rules regarding allocation of appropriations pursuant to 18B-1A-5
 - Removes duty to establish peer groups
 - Removes authority to establish benchmarks and performance indicators for **Exempt Institutions**

-
- o Only “confirm” presidential selections of non- **Exempt Institutions**
 - o Removes authority of HEPC over **Exempt Institutions** over presidents.
 - o Removes HEPC approval of **Exempt Institutions’** presidential compensation
 - o Presidential increase of same percentage as other staff need not be approved.
 - o Removes HEPC requirement to establish a policy to assure students and parents have sufficient information for academic decisions
 - o Remedial standards set by HEPC only have to be uniform at an institution and not throughout higher education
 - o Removes authority of managing system wide technology over **Exempt Institutions**
 - o Requires cooperation with governing boards to establish policies granting credit for various work or training
 - o HEPC authority over capital rule deleted re **Exempt Institutions**.
 - o Substantial deference to be given by HEPC to “value judgments” of Boards of Governors must be included in rule
 - o HEPC still to submit appropriation request for all Board of Governors under its jurisdiction. Language in this section seems to indicate that the **Exempt Institutions** are institutions “under the jurisdiction” of the HEPC while other sections imply otherwise. That section reads:” Submit to the appropriate agencies of the executive and legislative branches of state government an appropriation request that reflects recommended appropriations for the commission and the governing boards under its jurisdiction. The commission shall submit as part of its appropriation request the separate recommended appropriation request it received from the council, both for the council and for the governing boards under the council’s jurisdiction, including the exempted schools.” (See below for other examples)
 - o HEPC may assess institutions under its jurisdiction, including **Exempt Institutions**, for funding of statewide initiatives under that subdivision until July 1, 2018.
 - o Removes language requiring HEPC and CTC to promulgate rule standardizing personnel administration under articles 7, 8, 9 and 9A
 - o HEPC tuition rule not to apply to EEs.
 - o HEPC may not implement disease awareness initiatives
 - o Removes HEPC requirement for planning and policy leadership and setting state’s policy agenda
 - o No longer implement institutional mission definitions
 - o Limits program approval by HEPC over **Exempt Institutions** to programs being offered at new locations
 - o Sets new criteria for program approval:
 - Does not change institutional mission
 - Significant expenses will be addressed by reallocation or spread over future years from net revenues
 - Undergraduate programs similar to another program in geographic service area not approved unless compelling need
 - Programs of **Exempt Institutions** not to be taken into consideration
 - o HEPC to set format for program approval to be requested. Chancellor to determine within 2 weeks whether submission meets requirements. After format is proper HEPC must approve or disapprove within 30 days.
 - o Removes authority for establishing and implementing information, assessment accountability and personnel systems for state colleges and universities
 - o Removes authority for implementing projects related to postsecondary education at the baccalaureate level from federal or other incentive funds
 - o Removes requirement to provide quality assurance in areas of research, data collection and analysis, personnel administration, planning, program review, budgeting etc
 - o Removes authority to develop budgets and allocate resources for Board of Governors
 - o Except for **Exempt Institutions**, HEPC to review institutional operating budgets, review and approve capital budgets
 - o May provide info and research to state colleges and universities re programs with a 90% employment rate

- o May provide info and recommendations to Board of Governors on coordinating with State Board of Education
 - o HEPC may not withdraw Board of Governors powers for failure to have approved compact for two years
 - o HEPC to examine general revenue appropriations per student, credit hour and other measures and deliver report to Joint Committee on Government and LOCEA by January 1, 2018. Shall make recommendations on a formula for allocation.
- 18B-1B-6. Appointment of Presidents
 - o For the non- **Exempt Institutions**, HEPC only confirms selection of a president. EEs appoint a president without HEPC confirmation or approval.
 - o Legislative rules of commission and council re presidents not applicable to **Exempt Institutions**
- 18B-1D-2 Definitions
 - o “Institutional compact” deleted
 - o “Institutions under the jurisdiction of the commission” deletes MU, WVU and WVSOM. However, other parts of the bill indicate those schools are under the jurisdiction of the HEPC (See below)
- 18B-1D-4. Responsibilities of HEPC and CTC
 - o Deletes HEPC responsibility to align state goals with the non-EEs
 - o Clarifies HEPC to collect data of institutions, including that of EEs. No penalty or enforcement mechanism delineated for those failing to supply data.
 - o EEs not required to report to HEPC on plans, accomplishments and recommendations to implement goals and objectives of compacts
- 18B-1D-7. Institutional compacts
 - o EEs relieved of duties to prepare compacts
 - o Removes language that makes compacts contracts between HEPC and CTC and institutions
 - o Compacts to be updated biannually instead of annually
 - o HEPC to provide technical assistance on compacts to schools other than EEs
 - o HEPC to only confirm compacts and not approve them
 - o HEPC to assign geographic areas of responsibility except to **Exempt Institutions**.
 - o HEPC to develop data-based measures regarding education services except for .
 - o Benchmarks and performance indicators to not apply against **Exempt Institutions**
 - o HEPC to confirm compacts except for **Exempt Institutions**
- 18B-1F-10. Study
 - o Department of Commerce to study and make recommendations re Tech Parks by December 31, 2017
- **18B-2A-3. Oversight**
 - o **Board of Governors subject to “oversight” of HEPC instead of “supervision”**
 - o Authority of HEPC over **Exempt Institutions** limited to specific authority granted under chapter
 - o Strikes language stating Board of Governors subject to personnel law in articles 7, 8, 9 and 9A
- 18B-2A-4. Powers and duties of BOGs.
 - o HEPC approval not needed for master plans of **Exempt Institutions**
 - o HEPC may review and comment on master plans of **Exempt Institutions**
 - o HEPC may review degree programs but only to extent allowed in code under HEPC powers
 - o Master plans for **Exempt Institutions** updated biannually. **Exempt Institutions** to submit master plans to LOCEA
 - o Any personnel rules adopted by HEPC or CTC because of certain code sections do not apply to
 - o HEPC may not revoke delegation of authority by Board of Governors to president regarding.
 - o BOGs under HEPC may contract for supplemental employee benefits.
- 18B-3-1. Additional Powers of **Exempt Institutions**
 - o Deletes requirement that **Exempt Institutions** perform their duties consistent with HEPC and CTC and not in conflict with them
- 18B-4-7. Accreditation
 - o Removes power of HEPC or CTC to remove power to confer degrees if institution refuses or willfully fail to disclose requested information

-
- 18B-5-4. Purchasing
 - EEs to adopt own purchasing rules
 - Joint rules for other institutions must show appropriate deference to the value judgments of Board of Governors
 - Board of Governors can allow foundations and other institutions to purchase off their contracts
 - 18B-5-6. Other purchasing provisions
 - Institutions may use design-build contracts without having to get approval and may use other commonly accepted methods of procurement if:
 - Employs one LEED administrator;
 - Employs one CFM or one PMP
 - 18B-5-7. Disposition of obsolete
 - HEPC, CTC, and Board of Governors may donate obsolete equipment to not for profit entities
 - 18B-5-9. Higher Ed Fiscal Responsibility
 - Changes the technical terms for accounting practices
 - 18B-10-1. Tuition and fees
 - BOGs may set separate fees for online course delivery and those are not subject to any limitation
 - EEs may place all categories of tuition and fees into a single special revenue account
 - Strikes requirement that all tuition and fees shall be paid before awarding credit.
 - Strikes requirement that HEPC and CTC promulgate rule regarding deferred payment plans
 - EEs to not be subject of HEPC tuition and fee rules
 - Tuition and fee increase above 7% a year based on a 3-year rolling average must be approved by HEPC or CTC. Can be up to 10% without approval if it stays within the 7% average
 - In approving tuition and fees HEPC must examine benchmarks of master plans of **Exempt Institutions**
 - 18B-10-1c. Definitions.
 - Removes clarifying language describing E&G fees
 - 18B-10-8. Bonds
 - Removes approval of revenue bonds for **Exempt Institutions** from HEPC
 - EEs revenue bonds issued by BOGs and signed by Governor
 - HEPC confirms bonds for non- **Exempt Institutions**
 - CTC approves bonds for CTCs
 - 18B10-16. Disposition of funds
 - **Exempt Institutions** may deposit all fees into a single account.
 - 18B-19-1. Findings
 - Finds that renovations might not be financially efficient
 - Takes away requirement that HEPC and CTC should participate to a greater extent in capital projects at smaller institutions
 - 18B-19-3. System capital planning
 - Changes date for HEPC and CTC to have system capital development plan to December 31, 2017. Changes “plan” to “policy”
 - Process to be in place for BOGs to get confirmation of institutional capital plans from HEPC and approval from CTC.
 - 18B-19-4. Campus development plans
 - Campus plans must be approved by CTC, confirmed by HEPC and not addressed for **Exempt Institutions**
 - Only requires a list of major deferred maintenance projects exceeding \$75,000
 - Deletes requirement for list of deferred maintenance to instead an analysis
 - Updates of campus plan subject only to HEPC confirmation but CTC approval
 - EEs may implement plan without confirmation of HEPC
 - 18B-19-5. Capital appropriation request.
 - Prioritized capital request only prepared by HEPC and CTC, not approved
 - Projects may not be included in list unless confirmed or approved by HEPC or CTC
 - Major maintenance projects lists only prepared by HEPC and CTC and not approved
 - HEPC and CTC to provide a “recommended” building renewal calculation

-
- 18B-19-6. Capital financing
 - EEs need not seek approval of HEPC for capital financing.
 - Projects over \$1 million need approval of CTC
 - Projects over \$3 million under jurisdiction of HEPC other than **Exempt Institutions** must be approved by HEPC.
 - BOGs to notify Joint Committee on Government and Finance 30 days before starting project over \$1 million
 - 18B-19-7. Capital project management
 - BOGs under jurisdiction of HEPC exempt from provisions of capital management if they employ one LEED certified administrator and one Certified Facilities Manager or one Project Management Professional
 - BOGs to promulgate capital management rule but need not be consistent with rule of the HEPC or CTC
 - BOGs need not use state standard contracts
 - Authority of HEPC to review or audit capital projects remains periodically to see appropriate capital management practices are being met
 - 18B-19-9. Facilities Information System
 - Capital facilities information system to be maintained for institutions by HEPC and CTC except for **Exempt Institutions**.
 - Cannot use this to burden or interfere with Board of Governors.
 - 18B-19-10. Authorization to sell property
 - Section governs sell or transfer of property but not leasing.
 - For property over \$50,000 must provide written notice to county commission and municipalities and each legislator
 - No lease of property over \$50,000 a year without following these procedures
 - Removes requirement that funds from sell must go into special revenue account for appropriation by Legislature. Goes directly to institution.
 - 18B-19-11. Authorization to lease-purchase
 - EEs may enter into these agreements without approval of HEPC.
 - Other BOGs must get HEPC approval for lease purchase over \$1.5 million
 - 18B-19-13. Real property contracts
 - Purchase of real estate over \$1 million must be approved by HEPC, except **Exempt Institutions**, or CTC and provided to Joint Committee on Government and Finance.
 - Acquisition by a foundation or research corporation of a CTC of property over \$1 million or requiring \$1 million in repairs must be approved by CTC
 - 18B-19-14. Sale lease-back
 - Institutions may sale property then lease it back with CTC approval or HEPC confirmation, except for the EEs
 - Notice need be given
 - 18B-19-19. Applicability
 - Boards of Governors and **Exempt Institutions** may, without approval of HEPC, take any action that would authorize approval or confirmation of HEPC. This seems to say that all the confirmation and approval language in this article is counteracted.
 - Hover, HEPC can request any relevant information from Boards of Governors and they shall provide it.
 - There is some ambiguity as to whether the **Exempt Institutions** remain under the “jurisdiction” of the HEPC as referenced many times in the code. This can have a determinative effect on many pending issues. However, there are a number of instances where the legislation refers to “institutions under the jurisdiction” of the HEPC including the **Exempt Institutions**. Plain language indicates that the EEs are included as those under the jurisdiction of the HEPC. For specific sections using this language see:
 - 18B-1B-4(a)(28) Budget request
 - 18B-1B-4(a)(29) Assessment
 - 18B-1D-4(c) Data collection
 - 18B-1D-4(4)(f) Budget request

-
- o 18B-5-4(a) Purchasing
 - o 18B-10-1 Tuition

November 7, 2018

Michael J. Farrell, Esq.
Chair, Collaboration Subcommittee
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard, East, Suite 700
Charleston, WV 25301

Dear Chairman Farrell:

Thank you for the opportunity to share the collaboration initiatives that Bluefield State plans to implement in early 2019. We believe in the collective power of partnerships and have proactively pursued a number of successful collaborations in recent years to enhance opportunities for our students and the College. One of our most recent and exciting partnerships is with the West Virginia Army National Guard. This new agreement provides the WVARNG with recruiting space on campus. The partnership is a win-win; the recruiting office brings potential students to campus, and students who already are enrolled at Bluefield State have easier access to learn about the excellent financial aid benefits that membership in the Guard provides.

Beginning in January 2019, Bluefield State will expand our current collaboration efforts with Concord University. This week our two institutions are partnering on two initiatives: (1) Quality Matters training on best practices for online education and (2) a jointly sponsored program honoring our country's military veterans and first responders. As of this fall, Bluefield State and Concord have implemented a common calendar for our main campus locations as well as at the Erma Byrd Higher Education Center in Beckley. Academic leadership of the two institutions met earlier this semester to extend the common academic calendar through 2020-2021. Bluefield State and Concord are presently offering 18 shared courses at the Erma Byrd Center that serve over 100 students from both institutions. This will expand to 36 courses for the spring 2019 semester.

In addition, Bluefield State and Concord are exploring a new agreement that provides opportunities for Bluefield State Business majors to study Sports Management at Concord and for Concord's Business majors to study Health Services Management at Bluefield State. Two other new collaborative initiatives that we are actively pursuing for 2019 include: (1) partnering with New River Community and Technical College to identify four-year courses and programs that can be offered on NRCTC's Lewisburg campus and (2) developing articulation agreements that will streamline entry of Bluefield State's bachelor's degree recipients into specific master's degree programs at Concord.

Bluefield State also plans to expand our partnership with the West Virginia Department of Education. In June 2017, the College signed a statewide articulation agreement with the Department of Education that enables graduates from any career technical center in the state who have taken coursework in specified health care programs to qualify for and apply their

Toll-free in WV 800.344.8892 | In VA, DC, OH, KY and parts of MD and PA 800.654.7798

credits in Bluefield State's Allied Health programs (see attached). This is the first and only such agreement in West Virginia. Bluefield State is currently in discussions with the Associate Superintendent for Career Technical Education regarding the expansion of this agreement to include other career technical fields beyond health care.

Given Southern West Virginia Community and Technical College's allied health and technical programs, which include instruction in drone technology, Southern's President and I have discussed potential partnerships. We are continuing those conversations next week in a meeting with our Provosts to identify specific programs and areas in which our institutions can collaborate in 2019.

These new collaboration efforts will add to Bluefield State's already extensive list of collaborations which include:

- Articulation agreements with New River Community and Technical College that guarantee students who have earned their associate's degree in programs such as Business and Engineering Technology can apply their credits seamlessly toward a four-year degree at Bluefield State.
- Articulation agreements with Mercer County Technical Education Center in Engineering Technology, Business, Education, Health Care, and Criminal Justice. We also have agreements with Monroe County and McDowell County Technical Education Centers. The credits students earn in these technical education centers are automatically applied toward their associate's and/or bachelor's degree program at BSC (up to 9 credit hours, depending on the program).
- An articulation agreement with Marshall University for graduates of Bluefield State's Bachelor's in Nursing program to enter Marshall's Master of Science in Nursing program.
- Jointly sponsored "Interprofessional Health Education Days" with the West Virginia School of Osteopathic Medicine. This initiative brings the College's associate degree in nursing and radiologic technology students together with medical students in a simulated clinical setting, providing valuable real-life experience and career preparation.
- Research collaborations with Marshall and WVU. Bluefield State faculty receive sub-awards for research through WV INBRE that enable them to undertake important research and also to engage their students directly in research studies. Last year, our faculty received WV INBRE awards in excess of \$114,000. This is a "high-impact practice" that deepens student learning and offers BSC undergraduates a valuable opportunity to work side-by-side with faculty. It also prepares students well for advanced study in graduate or medical fields.
- An articulation agreement with Chattanooga State Community College in Tennessee that enables Bluefield State Radiologic Technology students to obtain a Nuclear Medicine concentration. With this background, our graduates are even more attractive to prospective health care employers, and the College is meeting an important workforce need.
- Over 20 articulation agreements with multiple community colleges in Virginia, including Wytheville, Southwest Virginia, Virginia Western, Dabney S. Lancaster, and Central Virginia Community Colleges.
- Numerous partnerships with local community and civic organizations. For example, faculty from BSC's School of Education will attend a meeting regarding implementation of the "Family First" initiative in Southern West Virginia; accounting students complete 300 to 400 income tax returns each year for local residents through the VITA program; and BSC nursing faculty have partnered with the City on a health research grant.

Bluefield State is an active member of the Mercer County Development Authority and recently attended an economic development meeting with USDA and Development Authority officials to discuss further partnership opportunities.

Thank you for this opportunity to share Bluefield State's collaboration plans for 2019 as well as provide you with information regarding our many current partnerships. Please feel free to contact me if you have any questions or would like additional details.

Sincerely,

Chairman Mike Farrell
914 Fifth Avenue
P.O. Box 6457
Huntington, WV 257041

Dear Chairman Farrell,

In response to the Draft Report and Recommendations of the Collaboration Subcommittee, I have to admit that Dr. Jenkins' comments best represent my current concerns. Having a third institution in our immediate service area has already begun to present each of us with enormous enrollment challenges that are likely to remain. WVU is fortunate to have the resources to fund their branch campus in Beckley for a long time, although Ms. Carolyn Long often has expressed concern that their administration expected the Beckley Tech campus to stop losing money.

I am certain that we are not opposed to collaboration, and have shown our willingness to collaborate with many institutions. However, we do not want to lose our mission, our traditions, or our student population to a huge institution that doesn't always best match our students' particular needs and goals. I appreciated your definition of collaboration because it better defines my concerns, mutually beneficial relationships should be the goal, not dominance nor destruction of the regional institutions.

Having no oversight, policies or rules regarding branch campuses being established wherever and whenever an institution decides is not sustainable with the demographic forecast we have seen. I find it troubling that the fate of the Higher Education Policy Commission largely rests with the exempted institutions and logic does not serve me in understanding why one institution in particular has such interest in seeing it dissembled.

I need to know and understand where the currently available HEPC services and responsibilities will be found, who will manage them, and some idea of the estimated costs for those services if we are not all sharing them.

Finally, there is a great need for an unbiased, independent entity for data analysis, for research funding distribution, for lobbying the legislature, and for all of the other services the HEPC currently provides. It is essential to the long-term viability of the higher education system in WV.

Sincerely,

Kendra S. Boggess, Ph.D.

November 7, 2018

Michael J. Farrell, Esq
Chair
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard East, Suite 700
Charleston, WV 25301

Dear Chair Farrell,

I want to thank you for the opportunity to respond to the Blue Ribbon Commission Collaboration Subcommittee. I am proud to say that Glenville State College has been engaging in a number of collaborative activities across the region and state that strengthen all partnering entities and provide for increased student access, affordability, and success. Following are some examples of current partnering activities and some planned for the near future.

Collaboration Activities –

- External partnerships with Community and Technical College were expanded by entering into MOUs with both Pierpont Community & Technical College and New River Community & Technical College to articulate several of their Associate degree programs with Glenville State College baccalaureate degree programs. Additional degree programs will be articulated in the near future and dual admission initiatives are being developed to create more seamless paths of progression and completion.
- External partnerships with other Universities are being developed by entering into an MOU with Marshall University to articulate Glenville's Exercise Science baccalaureate program with Marshall's Masters - Athletic Training program. Glenville State will be attempting to connect with other West Virginia Colleges and Universities to ascertain the viability of shared degree programs.
- External partnerships with various West Virginia public school districts are being developed through Dual Enrollment offerings. An articulation agreement with Braxton County Schools was recently initiated to deliver courses leading to an Associate's degree – the first such agreement and program in West Virginia. Other school districts are being approached to offer the same type of arrangement, significantly reducing time and cost to degree. Other partnerships with public school districts to offer hybrid programs outside the normal school day are being devised.

200 High Street " Glenville, West Virginia " (304) 462-4110 " (304) 462-7610 (FAX) " www.glenville.edu

President

- International learning and collaboration is being expanded through Glenville State's Collaborative Online International Learning (COIL) program. The COIL program partners Glenville State students with students in classrooms in other countries thereby allowing them to work collaboratively to complete academic tasks that have been designed (also collaboratively) by their course instructors.
- Shared service collaboration as related to electronic library resources and grant writing will be explored with other West Virginia higher education institutions to gain greater efficiency in costs and services.
- Glenville State is looking to develop a cooperative education program to work with local and regional employers to decrease student debt and respond to employment gaps in the West Virginia private sector job market. Glenville students would work for local and regional world-class companies and position themselves for long-term post-graduation employment.

Glenville State College is committed to collaboration across all education levels and sectors to enhance greater college access, affordability, and success. In addition, we recognize that strong collaborative engagement can be good for all participants and can assist in developing a vibrant and positive economic environment. We look forward to continuing Glenville State's long tradition of collaboration to better serve all students, the region, and state.

Sincerely,

Tracy L. Pellett, Ed.D.
President

Michael J. Farrell, Esq.
Chair, Collaboration Subcommittee
Blue Ribbon Committee on Four-Year Higher Education
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard, Suite 700
Charleston, WV 25301

Dear Chair Farrell:

Thank you for the opportunity to share Marshall University's vision for enhancing higher education through collaboration and innovation. I am committed to working for our students and the citizens of West Virginia to broaden the educational and economic development activities of the state.

Next year, Marshall is going to initiate and expand a number of collaborative activities designed to bring people together and expand opportunities. Listed below are examples of our activities planned for 2019:

Enhancement of Dual Enrollment and On-line High School Offerings. In order to give high school students in Cabell, Putnam, and Wayne Counties additional college enrollment opportunities, we will be expanding access to the students for on-campus lecture and laboratory experiences by opening up additional seats in our classes for our local students. This is in addition to broader state-wide efforts to increase dual enrollment and on-line offerings. For 2018, Marshall saw an increase of 80% in high school enrollment. Our numbers went up from 812 last year to 1,465 in the fall of 2018.

Partnership with BridgeValley Community and Technical College. Marshall has a strong and growing relationship with BridgeValley CTC. Three new programs are being developed for 2019, and they include:

- I. Seamless Four-Year Degree at BridgeValley's Montgomery Campus. Marshall is working with BridgeValley to be able to offer the Regents Bachelor of Arts degree on the Montgomery campus of BridgeValley. Students will take the first two years of the program from BridgeValley and then can remain in Montgomery to take the last two years of the program from Marshall.
- II. A New 2+2 Program in Business Administration. Marshall will begin offering a 2+2 program with BridgeValley to allow students to obtain the BBA degree. Students will take the first two years at BridgeValley and the last two years on Marshall's Huntington campus or with a combination of on-line and on-campus courses.
- III. A New 2+2 Program in Medical Laboratory Science. Marshall will begin offering a 2+2 program with BridgeValley to allow students to obtain the BS MLS degree. Students will take the first two years at BridgeValley and the last two years on-line through Marshall.

WE ARE... MARSHALL.

Page 2

Partnership with Southern West Virginia Community and Technical College. In 2019, Marshall will offer a 2+2 Program in Business Administration with Southern WV CTC to allow students to obtain the BBA degree. Students will take the first two years at Southern and the last two years on Marshall's Huntington campus or with a combination of on-line and on-campus courses.

Autism Collaboration with Shepherd University. Marshall's Autism Training Center is working to help Shepherd University develop a full time program for academic, social, and independent living support for students at Shepherd who are on the autism spectrum. We have also worked with Mountwest and Pierpont Community and Technical Colleges, Fairmont State University, and Concord University to provide support to assist these institutions in helping students with autism.

Continued work with the WV Department of Commerce. Marshall University will continue to partner with the WV Department of Commerce on two major economic development efforts. The first effort is the Alliance for the Economic Development of Southern West Virginia, led by Marshall University and West Virginia State University. There are six four-year institutions and four two-year institutions in the Alliance <https://www.marshall.edu/aedswv/>. This group works together to foster an environment for economic development in Southern West Virginia. In mid-October the Alliance co-sponsored the Small Communities, BIG Solutions conference in Charleston to share best practices on various issues related to economic development and job creation. The second effort is West Virginia Forward, a partnership of Marshall University, West Virginia University, and the Department of Commerce <https://wvforward.wvu.edu/>. WV Forward is chartering a roadmap for economic recovery for the whole state of West Virginia.

Collaboration with American Electric Power (AEP) and Huntington Area Development Council (HADCO) to Promote the Aerospace Industry. Marshall has been working closely with AEP and HADCO to attract aviation industries to West Virginia. Marshall's Robert C. Byrd Institute has an AERO i6 grant from EDA and sponsored the Appalachian Next Generation Aerospace Conference in October of 2018 in Huntington. We are also engaged with Yeager Airport and Tri-State Airport to explore aviation education and research opportunities in 2019.

Outreach to Charleston to Provide Free Medical Services. Beginning in the spring of 2019, Marshall will bring its Marshall Medical Outreach program to the city of Charleston. Preliminary discussions with city officials have occurred, and we are developing plans on the specifics of program delivery.

As you can see from these examples of new and ongoing programs for 2019, Marshall University stands committed to working with other institutions, state agencies, and other entities for the good of our students and the citizens of West Virginia. We believe in being creative and innovative in exploring ways to create opportunities for excellence.

Sincerely,

Jerry Gilbert
President

Re: Blue Ribbon Commission (BRC) Collaboration Subcommittee

Dear Chairman Farrell:

Thank you for your letter relating to ongoing and new collaborations in which the higher education institutions are engaged. We reviewed your October 26 slide presentation to the BRC, and we listened to your remarks via telephone that day as well.

Respectfully, I am not sure we can provide exactly what you were soliciting in your letter. More specifically, your letter and your presentation to the BRC are framed to emphasize an ongoing role for the HEPC in promoting (or *causing*) increased collaboration efforts by higher education across the State. I do not wish to seem dismissive of the earnest efforts to serve the State well, but I am not well positioned to speak to the HEPC's role with other institutions. However, pertinent to Shepherd, the HEPC has only had a limited role in our collaboration successes, and unfortunately, in some cases, the HEPC has been an obstacle to collaboration opportunities.

Collaboration has been an emphasis for me in my professional work for many years. I was very interested and optimistic as my presidency at Shepherd began for a very important and promising collaboration initiative of Shepherd and the HEPC. I know this preceded your Chairmanship: HEPC staff and Shepherd University staff were deeply engaged in discussions with an Australian company to establish an international student pathway program which would be headquartered at Shepherd. The pathway components would be significantly led by the company, and students matriculating forward in their academic progress could remain at Shepherd or transfer to any of the West Virginia public institutions. Most unfortunately, the entire proposal collapsed because the HEPC could not get past several entrenched positions. For example, HEPC staff were insisting on assigning one of their own staff, by no means needed for the program, as an additional salaried employee of the pathway program, and the HEPC insisted on a governance model for the pathway program which would have involved an independent 501c3 of the HEPC's choosing and which insisted on having ultimate management control of the program even though it had no experience in operating international student programs of any type. If Shepherd had been permitted to proceed with closing the negotiations on its own, West Virginia would have an additional 150+ international students per year entering into the program. The fallout over this debacle is widely known and referenced by many.

In another disappointment, late in summer 2018, the University was developing a new collaboration initiative with its affiliated 501c3, but the HEPC staff have again become an impediment to our efforts. We identified several specific institutional priorities which we feel could be best achieved by doing a sole-source bond issue with our affiliated 501c3 Foundation, but the HEPC staff have insisted they would recommend against our proposed financing model -- due to its premise that the affiliated 501c3 Foundation should not be considered a sole source. We believed it would be highly desirable to achieve a small financing arrangement of \$4 million or less and keep the transaction "internal"; the Foundation's financial statements are rolled into the University's annual financial statements, as a component entity. It is our best understanding that a number of the higher education institutions have worked with their affiliated foundations in comparable ways in the past, but the HEPC staff have expressed adamancy in rejecting this plan initiated by Shepherd. As a result, our progression on trying to initiate a needed project was slowed, and we are exploring alternatives.

At Shepherd our experience as to collaboration is not that the State "needs" for the HEPC to serve a role in *prodding* us toward collaborations; our experience is that we succeed in establishing effective collaborations when allowed to find our own way toward partnerships that work effectively for our students and our university -- and are aligned with our strategic plan. In 2004, Shepherd gained university status and initiated a collaborative Masters degree program which would rapidly transition into our own, initial stand-alone Masters degree program, not by being prodded in some fashion by the HEPC, but rather by partnering with a sister institution in West Virginia (Marshall).

Collaboration is indeed an important dynamic for a modern university to maximize -- to ensure that it is meeting the needs of its students and its community. At Shepherd we have resolved that we will not let ourselves become consumed with how our partnerships affect our "data reports" to Charleston; we are committed to serving our community and our next generation of leaders and meeting their needs, even if that service does not always translate into enrollment or other reported data elements. We have institutionalized collaboration into our operations to such a degree that I cannot effectively report on all of it in a prompt response to your inquiry. I offer on the following pages an example of the scope of what we are doing at Shepherd to work with other higher education institutions, public and private local k-12 schools, local and regional industry, local and regional non-profits, and national and international issues.

I do not want to discount that we have achieved some limited valuable collaborations with the HEPC staff. A number of the staff are bright and talented, and I believe they are all earnest in their intentions. I recognize that they face many challenges in the work they do in Charleston.

I hope all of this information will be helpful to the Blue Ribbon Commission Committee on Collaboration.

With respect and appreciation,

Mary J.C. Hendrix, Ph.D.
President

OTHER INSTITUTIONAL COLLABORATIONS WITH LOCAL AND REGIONAL ENTITIES

- Shepherdstown Town Government: \$48,000 grant from Town to assist in paving of new parking lot, and establishment of cooperation in shared uses of parking lots
- WV National Guard Patriot Gardens Project : partnering in planning and implementation of new Veterans to Agriculture certificate program
- Photobiomodulation Foundation: partnering to advance research in this new health treatments field and providing experiences in nursing education
- Community Members: Dinner with Strangers collaboration in which distinguished couples from the community host a small group of undergraduate students for mentorship and fellowship over dinner
- Building Resilient Opportunities in Culturally Aware, Diverse Environments (BROCADE) : partnering to leverage innovative technologies and public-private partnerships for community-based economic improvement in Appalachia.
- Congressional Education Foundation: ongoing partnership established in 2000 to provide for the operations of the Robert C. Byrd Center for Congressional History and Education on Shepherd's campus
- George Mason University: utilized GMU engineering graduate students to conduct energy feasibility study on Shepherd campus
- Martinsburg Police Department and Berkeley County Public Schools: three-way partnership in establishing The Martinsburg Initiative combating opioid abuse
- Contemporary American Theater Festival at Shepherd University: ongoing 27-year collaboration with an independent 501c3 to showcase premiere, professional summer theater on campus
- Shepherd University Foundation: ongoing partnership for the operations of the public-private partnership in the ownership and management of the new residence hall, Potomac Place, which opened August 2017
- Chesapeake Watershed Studies Consortium: a collaboration of federal and state agencies, more than twenty academic institutions, and non-governmental conservation organizations engaged in efforts to preserve and enhance the condition of the Chesapeake Bay and its entire watershed
- West Virginia Public Broadcasting: partnering to provide on-campus space for their Eastern Panhandle reporter
- American Conservation Film Festival: partnering to host special film presentations on campus
- Potomac Valley Audubon Society: partnership to replace a demolished, dormant boiler-smokestack, which had become a nesting place for chimney swifts, with a substitute faux chimney on the campus at an appropriate location
- US Department of Veterans Affairs: initiatives to increase veterans enrollment/retention/ graduation

- Partners of the Americas: partnership in implementing Capacity Building Grants for undergraduate study and learning experiences in Jamaica
- Shepherdstown Visitor Center: partnership to provide needed space for the Visitor Center to operate and provide effective service to community visitors
- Concord University, CONTACT Huntington Inc, Davis & Elkins College, Family Counseling Connection Inc, Family Refuge Center, Glenville State College, Marshall University, Shenandoah Women's Center, Task Force HOPE, Osteopathic School, WV State University, WV Wesleyan College, and Women's Aid in Crisis: consortium in sexual violence prevention and response
- Veterans Administration: ongoing collaboration for support of Team River Runner, a support program for veterans in their recovery from service injuries
- Freedom's Run: ongoing collaboration to host nationally recognized annual wellness event featuring a variety of running events with Shepherd's campus as the hub
- Friends of Happy Retreat: partnership with the 501c3 which has the management rights as to the two Washington Family homes [two of President Washington's brothers] in Charles Town and Jefferson County, to develop outreach programming
- Alliance for Excellent Education Project (All4Ed) : an initiative to enhance high school achievement/ completion in the Southern Pennsylvania/ Northern West Virginia region
- Antietam National Battlefield Park: Shepherd's George Tyler Moore Center for the Study of the Civil War routinely collaborates with the Battlefield for advancement of learning relating to the Civil War
- Morgan Academy: partnership with a local private school which has operated at the elementary and middle school level previously. Shepherd is hosting its initiative to expand to grades 9-10 this year while the school expands its own permanent facilities

HEPC

Shepherd has found value in several collaborations led by the HEPC. In the student life area, the annual WV Student Leadership programs have been popular with and meaningful for our student leaders. Shepherd has also participated for several years in a consortium led by HEPC for worker compensation insurance services, after privatization came to West Virginia, but we are re-examining the value of that arrangement.

Shepherd uses some limited collaborative service arrangements coordinated by WVNET for IT services or software systems provided by information systems companies, such as ARGOS.

WEST LIBERTY UNIVERSITY

Office of the President
208 University Drive
Campus Union Box #142
West Liberty, WV 26074

Stephen G. Greiner
Office: (304) 336-8000
Fax: (304) 336-8403
stephen.greiner@westliberty.edu

November 5, 2018

Michael J. Farrell, Esq.
Chair, Collaboration Committee
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard East, Suite 700
Charleston, WV 25301

Dear Chairman Farrell:

In response to your request to describe new collaborative efforts that the West Liberty University campus proposes to implement beginning in January 2019, I am pleased to provide the following list:

Proposed Collaborations

- We recently signed an articulation agreement with West Virginia Northern Community College that "guarantees" admission to West Liberty University to any student who completes the associate in arts degree at West Virginia Northern Community College. In 2019, we intend to extend this offer to all of West Virginia's community colleges.
- With the growth of our online masters' degree programs in Business, Criminology, Education, Health Care Management, and Professional Studies we intend to offer these degree programs to all West Virginia regional universities on a revenue sharing basis. This would greatly reduce the cost of institutions to start new graduate degree programs.
- In conjunction with the Regional Economic Development Board, we will develop a small business development center in downtown Wheeling.
- We will develop a reverse transfer agreement with West Virginia Northern Community College.
- We intend to finalize a consortium agreement with Bethany College and Wheeling Jesuit University that would permit students from the respective institutions to take one class per semester at any institution without additional cost.

Continuation of Current Collaborations

- We will continue our partnership with the West Virginia School of Osteopathic Medicine, which is based on the WVSOM sending students to WLU to complete a master's degree in biology, and upon successful completion be guaranteed admission to WVSOM.
- Student Intramurals – WVNCC, Wheeling Jesuit, Bethany College
- Title IX – WVNCC, Wheeling Jesuit, Bethany College
- High School Invasions – WLU faculty teach a day in high schools (John Marshall HS, Bridgeport HS)
- HS School Guidance Counselor Financial Aid Workshops, partnering with WVNCC
- HS Financial Aid Workshops for parents at local high schools (Wheeling Park HS, John Marshall HS, Linsly School, Madonna HS, Weir HS, Martins Ferry HS)
- Marshall County College Fair (Marshall County Schools)
- The president will continue to be an active member of the Wheeling Chamber of Commerce and the Regional Economic Development Board.

Respectfully,

Stephen G. Greiner
President

West Virginia School of Osteopathic Medicine

Office of the President

November 7, 2018

Michael J. Farrell, Esq.
Chair, WV Higher Education Policy Commission
1018 Kanawha Boulevard East, Suite 700
Charleston, WV 25301

Dear Mr. Farrell,

Thank you for inviting me to submit a letter to the Blue Ribbon Commission Collaboration Subcommittee regarding the West Virginia School of Osteopathic Medicine's (WVSOM) collaborative efforts with other institutions. WVSOM has developed collaborative relationships with numerous higher education institutions in West Virginia and adjacent states, as well as health care organizations that benefit our students. These collaborations include the following activities and institutions:

Interprofessional collaborative activities with: Alderson Broaddus University (Nursing, Physician Assistant students), Bluefield State College (Nursing students), Dabney Lancaster College (Nursing students), University of Charleston (Nursing, Pharmacy, Physician Assistant students), West Virginia University Institute of Technology (Nursing students), West Virginia Wesleyan College (Nursing, Nurse Practitioner students), and University of the Pacific (Pharmacy students).

Pre-osteopathic medicine program collaborations with: Alderson Broaddus University, Concord University, Davis & Elkins College, Waynesburg University, West Liberty University, West Virginia University Institute of Technology, and West Virginia Wesleyan College.

Admission affiliation agreements with: West Liberty University. We are working on an admissions agreement with Liberty University.

Institutional Research collaborations: Marshall University (WV-INBRE grant program), West Virginia University (WVCTSI grant program, also includes Charleston Area Medical Center, Marshall University and the Veterans Administration).

WVSOM is a member of the Alliance for Economic Development of Southern West Virginia along with Bluefield State College, BridgeValley Community and Technical College, Concord University, Marshall University, Mountwest Community & Technical College, New River Community and Technical College, Southern West Virginia Community and Technical College, West Virginia State University and West Virginia University Institute of Technology.

Another example of collaboration is in 2018, WVSOM received a \$25,000 grant to conduct a Title IX Investigator Certification Training on September 18-19, 2018 in Lewisburg, West Virginia on the campus of WVSOM. Last year, we hosted 105 participants while this year our number rose to 135 participants. Participants included individuals from: Blue Ridge Community & Technical College, Bridge

Valley Community & Technical College, Concord University, Fairmont State University, Glenville State College, Legal Aid of West Virginia, Inc., Marshall University, Mountwest Community and Technical College, New River Technical & Community College, Pierpont Community & Technical College, Shepherd University, Southern WV Technical and Community College, West Liberty University, West Virginia Northern Community College, West Virginia State University, West Virginia University, West Virginia University at Parkersburg, West Virginia University Potomac State College, West Virginia State Police, and WVSOM. This event provided higher education institutions across the state training from national experts on Title IX matters.

Hospital/Clinic affiliations: 46 Hospitals and Clinics in WV, 16 Hospitals and Clinics in adjacent states (Kentucky, Maryland, Pennsylvania, Ohio and Virginia).

WVSOM will continue to explore collaborations with institutions of higher education and health care organizations within West Virginia and in other states to meet the needs of our students.

Please let me know if you need additional information.

Thank you,

James W. Nemitz, Ph.D.

OFFICE OF THE PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

November 20, 2018

Dear Chairman Farrell and Collaboration Subcommittee Members:

Thank you for the work undertaken by the Subcommittee on behalf of the Governor's Blue Ribbon Commission. In his email on Monday, November 19, Chairman Farrell incorrectly states "no one from WVU attended" the Subcommittee's meeting that immediately followed the HEPC meeting Friday, November 16. Both Gordon and I were out of town Friday, so Paul Kreider, Vice Provost for Academic Strategies, Curriculum and Assessment, represented us at both the HEPC and Subcommittee meetings. Since Friday's Subcommittee meeting we have completed an extensive list of partnerships and collaborations "by and between WVU and other educational institutions (domestic and OUSA), businesses, industry, associations, and government entities." As extensive as the list is, it is not comprehensive as we know there are many more collaborations and partnerships in our 15 colleges. If it is helpful to the Subcommittee, we will be happy to continue to update the memorandum.

Due to the list's length, we have not included descriptions of each collaboration or partnership. However, where you have questions, we will be happy to answer them. We have purposely not included WVU's Extension Service or 4-H programs that are basic collaborations with all 55 counties. However, we have included programs with counties and schools that go above and beyond the typical Extension collaboration with a county. We have significant collaborations with schools to provide STEM education for teachers and students. Due to the large number of research collaborations and grants with WVU principal investigators at other international, national, or state institutions, we have also not included every grant. We have tried to be as accurate as possible in listing our collaborations with federal and state agencies and where I had any doubt about a collaboration, I did not include it in the memorandum.

WVU's partnerships with businesses and industry are extensive and reach around the globe making it difficult to provide a comprehensive list. For example, our Industrial Extension Program in the Statler College of Engineering has a list of more than 600 industry and business partners. WVU's Brickstreet Center for Innovation and Entrepreneurship, as well as our Launch Labs in Morgantown and Beckley have partnerships with business as well as economic development authorities throughout the state. In addition, the WVU Health Sciences Center and WVU Medicine collaborate with many hospitals, clinics and health-based businesses, but I do not have a single source for consolidated information.

OFFICE OF THE PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

It is a pleasure to have the opportunity to provide this information to the Subcommittee. Should Subcommittee members have questions about any particular collaboration or partnership, we will strive to provide additional information.

Sincerely,

A handwritten signature in blue ink that reads 'Joyce McConnell'.

Joyce McConnell / Provost and Vice President for Academic Affairs

A handwritten signature in black ink that reads 'Paul Kreider'.
